With operations on three continents and nearly 200 employees, MA micro automation is one of the leading international companies in the field of automation technology.

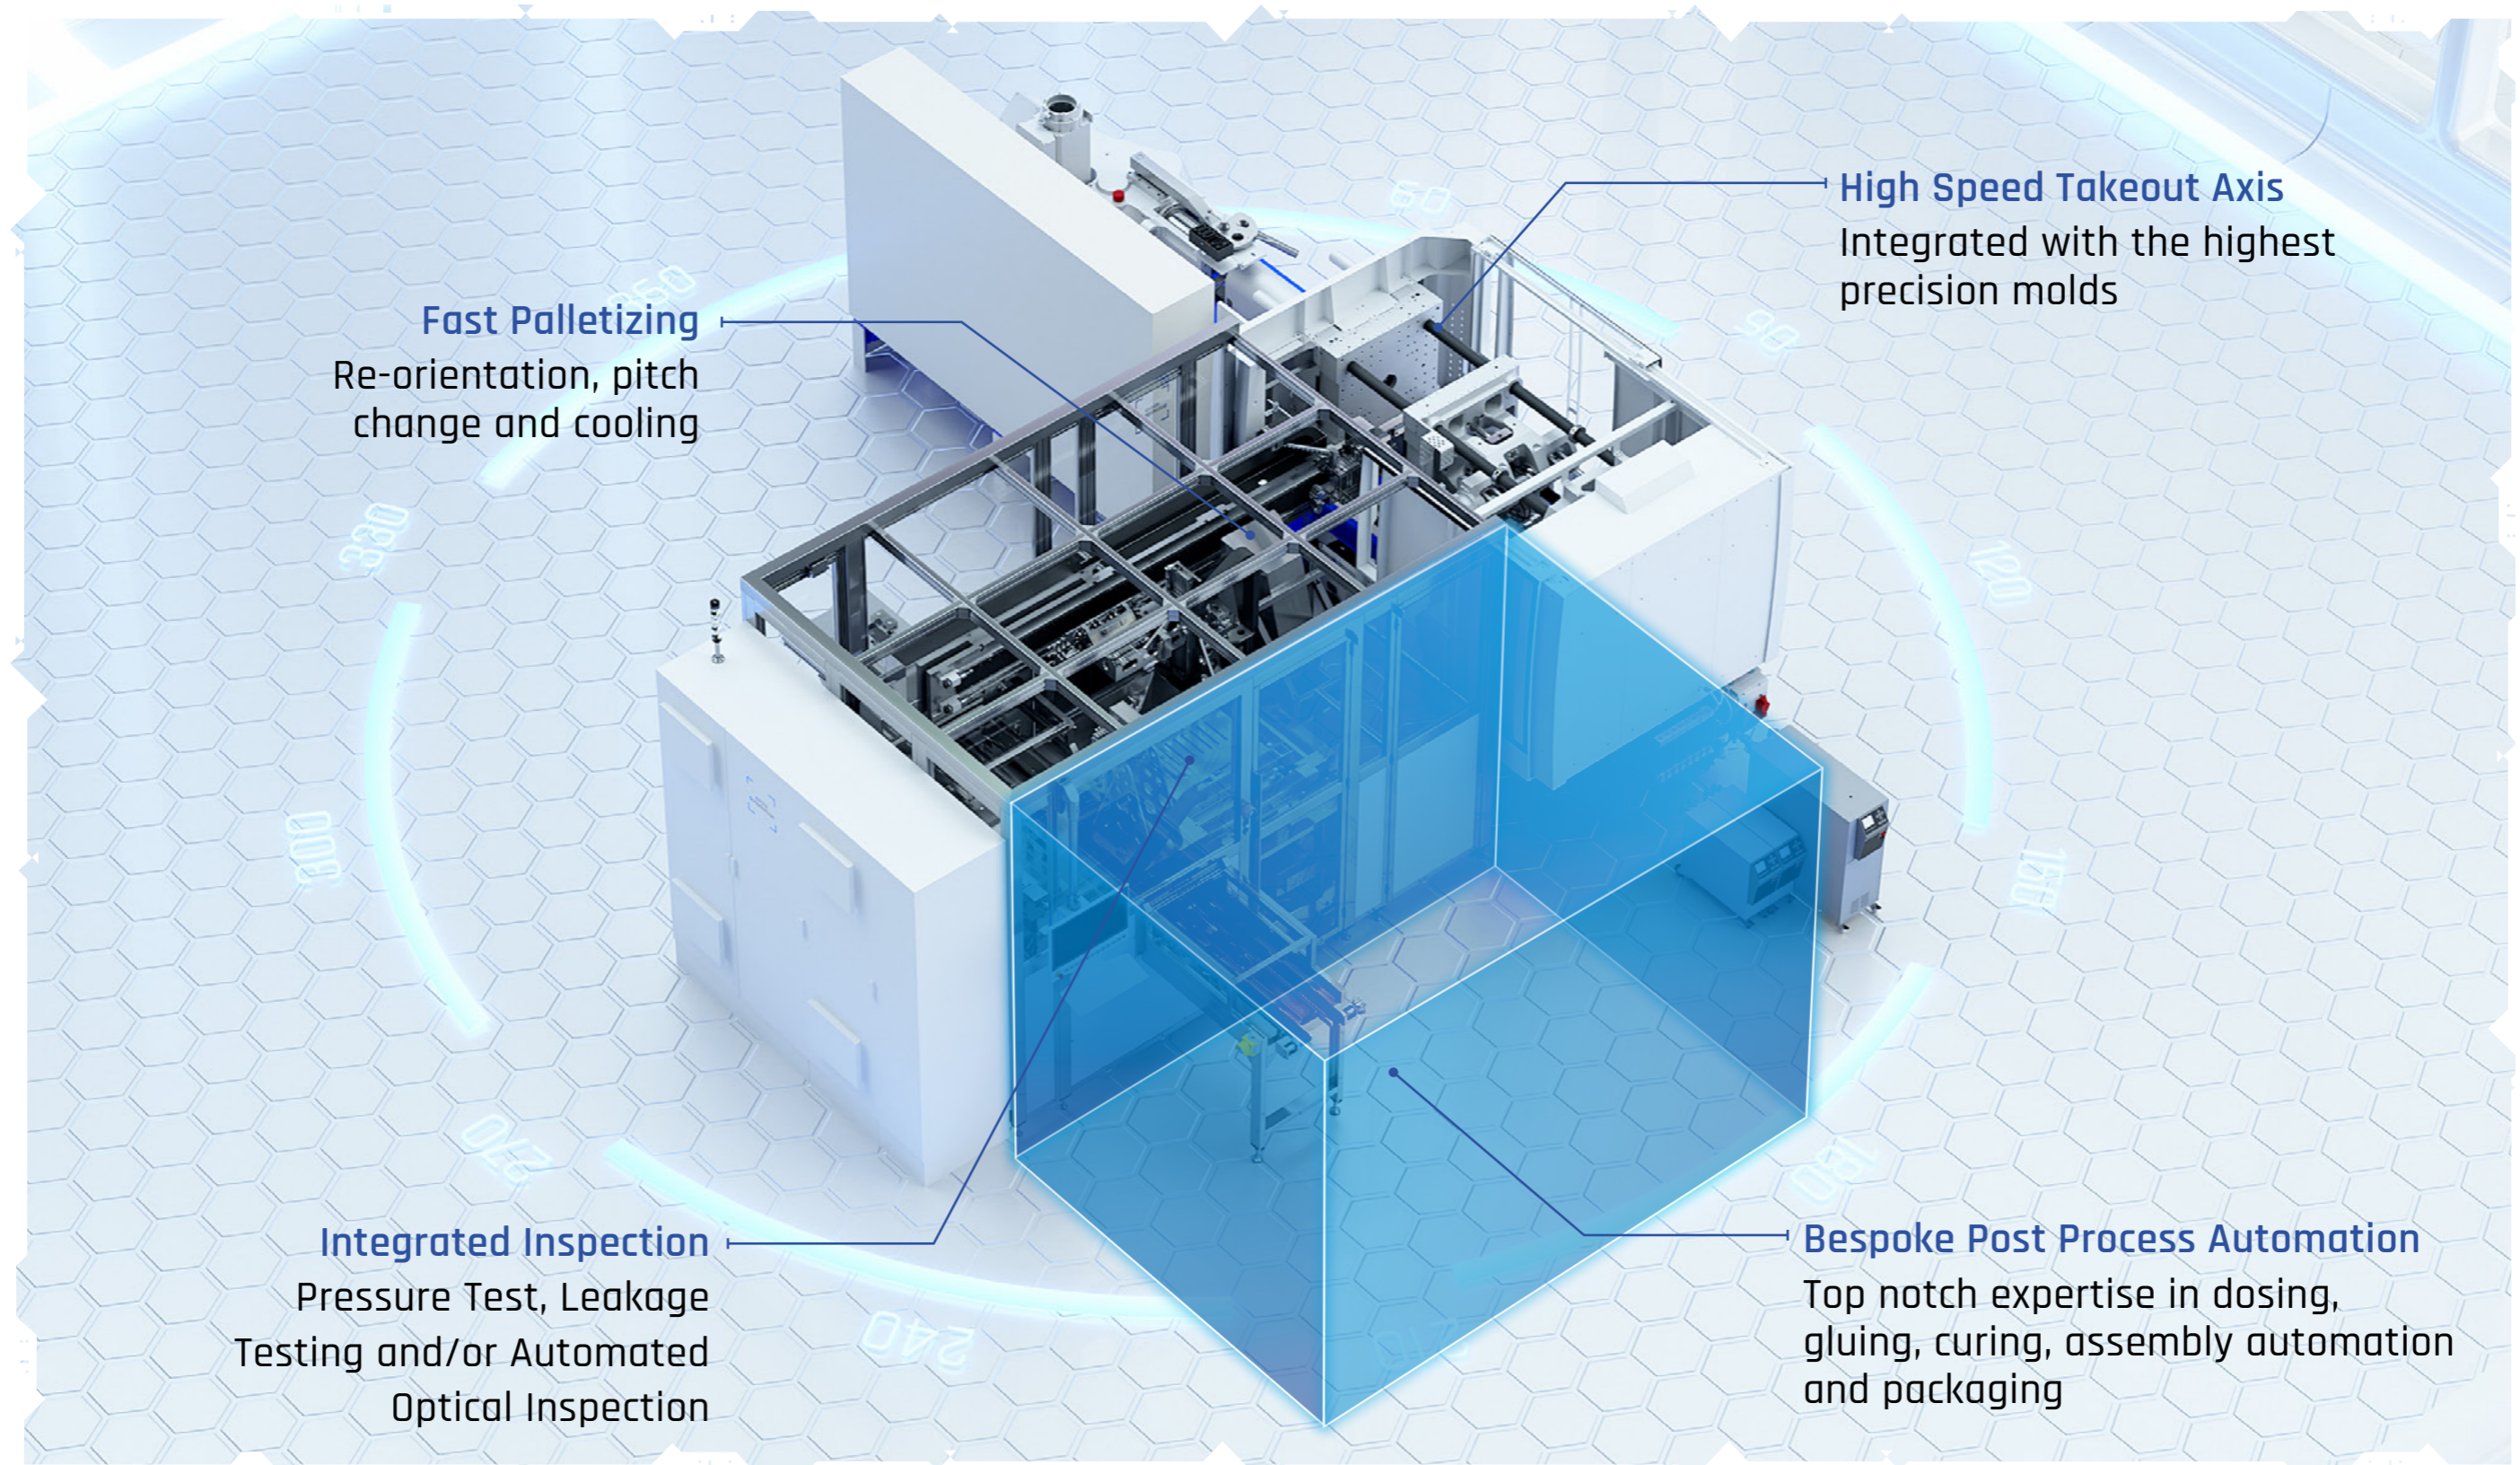

Facts & Figures

NEW BRANCH

02. Core Competence

03. Our Services

Maximize return on your investment with our U.S. based support team

Dedicated Relationship Manager

- ▣ Rapid Response
- ▣ Streamlined spare parts ordering
- ▣ Support for planning Life-Extension
- ▣ Consolidated knowledge base from Germany | USA | Singapore

Experienced Application Team

- ▣ Support for process optimization
- ▣ Accelerated production ramp-up
- ▣ Upgrades for Life-Extension

Highly Trained Mechanical & Electrical Support

- ▣ Reduced downtime
- ▣ Accelerated troubleshooting
- ▣ Available to meet temporary customer manpower needs

1
Pre-Production
Research and development for automation

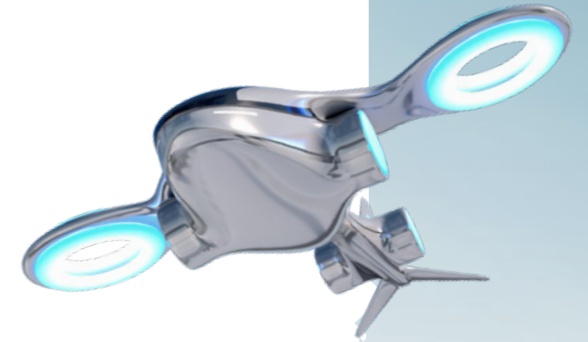

2
Pilot Run
Standard Modules for cost-effective automation

3
Mass Production
Fully automated Turnkey Solutions

4
Service Support
Dedicated Service and Digital Twin for High Output

Micro Automation serves your needs for the FULL Life Cycle

04. Market segments

- Diabetes Care
- In-Vitro Diagnostics
- Optical Devices
- Diagnostic Strips
- Point of Care
- Vision Care

We are experts in manufacturing, assembly and inspection of IVD and medical devices. MA micro automation offers custom designed solutions ranging from individual machines to entire turnkey production lines. Fully automated inspection and testing solutions are formulated for your exact needs. From high-quality injection molding of medical plastics, to precision cutting and assembly of POC Test Kits. When your medical device production demands micron-level precision, make it with MA micro automation.

Joachim Hardt, CEO

History Milestones

MA micro automation's history stretches back more than 50 years. Starting out as the Special Machine Automation department of Siemens AG, MA micro automation has grown rapidly since it joined MAX Automation SE.

Today, MA micro automation is a market leader in automation solutions for IVD and medical device production.
